

Job Exploration Worksheet

Northeastern University — Co-op Program

Student Name:	Chidvilash Yeccharla	Date:	May 2026
Job Title:	AI/ML Engineer Intern	Company:	Target: AI/ML Tech Company
Program:	MS Artificial Intelligence (Spring)	Co-op Start:	January 2027

Assignment Steps:

- 1) Find a job description
- 2) Analyze job requirements
- 3) Compare your credentials vs. requirements
- 4) Complete rating table below
- 5) Determine your gaps vs job requirements and write your gaps in the lines below
- 6) Write your action steps (how to close the gaps) in the lines below

REQUIREMENTS RATING

Requirement	My Credentials	Rating (1–5)
Education	MS AI @ Northeastern University, Silicon Valley (Spring — co-op eligible Jan 2027) B.Tech ECE with Minor in AI/ML, VIT-AP University GPA: 3.41/4.00	4
Technical Knowledge	Python, PyTorch, TensorFlow, LangChain, RAG, NLP, LLMs, Computer Vision, HuggingFace, FAISS, ChromaDB, Flask, Streamlit, Git	4
Work Experience	ML Intern @ ACMEGRADE Research Intern @ VIT-AP University Published paper at Springer ICISSE-2025	3
Certifications	No formal certifications yet Strong project portfolio and Springer publication as substitutes	3
Location	San Jose, CA — Silicon Valley Ideal for AI/ML internship roles	5
Academic Projects	Ask My Docs (RAG App) Salary Optimization Advisor (Flask + Groq API) Intelligent Spell Corrector (Streamlit) Plant Disease Detection (EfficientNetV2S)	5
Relevant Interests	LLMs, RAG, Neuro-Symbolic AI Computer Vision, Autonomous Systems	5
Transportation	Available to commute within Silicon Valley and Bay Area	4
Salary	Flexible with market-rate internship pay (approx. \$40–55/hr for AI/ML roles)	4

RATING SCALE

1 – Not meeting expectations	2 – Approaching expectations	3 – Meeting expectations	4 – Above expectations	5 – Exceeding expectations
------------------------------	------------------------------	--------------------------	------------------------	----------------------------

GAPS:

- 1) No formal industry certifications (e.g., AWS ML Specialty, Google Professional ML Engineer)
- 2) Limited full-time industry experience — only internships completed so far

- 3) No high-visibility open-source GitHub projects with strong community traction
- 4) Limited hands-on experience with MLOps tools and large-scale distributed ML systems

ACTION STEPS:

- 1) Pursue AWS Certified ML Specialty or Google Professional ML Engineer certification by end of 2026
- 2) Actively apply for Spring 2027 AI/ML co-op positions starting in Fall 2026 semester
- 3) Publish 2–3 polished open-source AI projects on GitHub with READMEs, demos, and documentation
- 4) Complete an MLOps course (MLflow, Kubeflow, or SageMaker) and build an end-to-end pipeline project
